

---> **Profile** > **Company Overview**

Mean Well Enterprises Co., Ltd. is one of the leading switching power supply manufacturers in Taiwan . Established in 1982, it gained ISO-9001 certification in 1994. Our product lines include AC/DC switching power supplies, DC/DC converters, DC/AC inverters and battery chargers.

To best serve our local distributors and offer faster services, Mean Well Europe was established in 2006 in the Netherlands as a sales and customer support center.

Situated in the major transportation center of Europe , Mean Well Europe fulfills the dream of being a neighbor to our best friends. Our main purpose is to help and assist our European distributors by providing either technical or logistic service to Mean Well's customers. Large inventory is kept to satisfy any urgent needs and just-in-time delivery without any delay. With a wide range of standard products, plus our well trained sales representatives, we are competent to suggest the most suitable product and offer one-stop-shopping. As part of reaching this milestone, Mean Well Europe is committed to providing prompt and local services to our distributors and customers. Whenever you have any power supply questions or needs, Mean Well Europe will be your trustworthy partner.

"Total Quality Assurance and Customer Satisfaction" are the central goals of our company. We believe that our industry is one where reliability in long-term use, functionality and cost are all of great importance, but that it is reliability that differentiates the truly superior products. So, every product in the Mean Well range is the result of rigid procedures governing design, design verification test (DVT), design quality test (DQT), component selection, pilot-run production, and mass production. We have recently implemented a new and highly efficient computerized management system. This system allows improved administration of sales, manufacturing, purchasing, fabrication management, shipping, customer service, and quality analysis, allowing us to ensure the best CQTS (Cost, Quality, Delivery Time, Service) for our customers.

Our goal is to offer total solutions that satisfy our customer's requirements. We have earned a good reputation based on the quality, competitive prices and punctual delivery of our products. This reputation has enabled Mean Well to enjoy an average of 28% sales growth in the past years. Currently, we have around 100 distributors and thousands of customers throughout the world. We have formed long-term associations with most of our customers, working together for many years, developing many treasured relationships.

We have around 2,500 standard models widely used in automation, communication, medical, moving sign, and office automation fields. Our 15,000 m² modern facility and the intelligent information management system allow us to keep enough stock for 95% of standard models, enabling prompt delivery. To meet customers' demands, Mean Well can deliver orders ranging in size from 1 to 20,000 units. Small and medium quantity orders are offered through our local branch office or authorized distributors, helping to save time. Large quantity orders can be sent directly from Mean Well. If you can't find a suitable model from our catalog, our talented R&D team can design a custom-made power supply to meet your requirements. With over 20 years of design and manufacturing experience in the power supply industry, we offer a total solution and would like the opportunity to become your long-term power partner.
